

CS 594—Enterprise and Cloud Security
Assignment One—Virtual Private Cloud—Rubric

Video that provides each of the following:

1. ☐ (10 pts) View of your VPC console showing the subnets for the VPC.
2. ☐ (10 pts) View of the custom routing table for the public subnet.
3. ☐ (10 pts) View of the security groups protecting access to instances in the public and private subnets, as well as for the NAT instance.
4. ☐ (5 pts) View of your AWS Console showing the running instances, including the external DNS for the app server.
5. ☐ (5 pts) View of your Payara Admin Console, showing Resources | JDBC | Connection Pools.
6. ☐ (45 pts) View of your local browser window showing the “Hello, World” application being deployed and running in your app server instance (same DNS as above). Access this instance via its Web page to demonstrate it running.

☐ (10 pts) Report.

☐ (5 pts) Completed rubric.
